Welcome to the third annual edition of the *CMB Buyers Guide!*

We are proud to publish *Canadian Meat Business* magazine six times per year along with this annual resource guide that features valuable information for buyers and sellers of related products and services to a national and international audience.

As vital as this industry is to the health and economy of our country, there seems to be a never-ending array of issues that can impact your business. Each sector of the food chain in Canada, from the farm gate to the dinner plate, is constantly challenged to keep pace with new technologies, new regulations, new competition and a changing demographic landscape.

One of the most important benefits of this resource guide is that within these pages, you will find a list of experts and industry professionals who may have the answers to these and many other questions including:

- What are the future trends of beef, pork and poultry consumption in Canada and around the world?
- Will the Canadian dollar continue to rise and will the Canadian economy continue to expand?
- What are the latest innovations in food safety and handling?
- Will Canadian consumer spending confidence strengthen or weaken?
- Will high protein diets continue to boost meat demand?
- Where are the new slaughter and meat processing plants in Canada?
- What are the trends for new ready-to-eat and prepared meat products?
- What are the challenges of an ethically diversified market and a growing, aging population?

The opportunities for growth, increasing revenue, establishing a competitive edge or even for finding a strategic partner are bounded in these 40 pages. Be sure to tell your customers, your vendors or your suppliers that you used the *2006 CMB Buyers Guide* to find them.

In this third edition, you will find:

Part I: an alphabetical listing of **Manufacturers, Distributors and Suppliers** along with contact information including names, addresses, phone and fax numbers, email and web site addresses.

Part II: a breakdown of **Product Categories** encompassing a wide variety of products and services listed in alphabetical order ranging from **Additives to Yeast Extracts**. Under each category heading, there is a list of companies offering that specific product or service. Look for the letter in brackets which indicates that a company is a Manufacturer (M), Distributor (D) or Supplier (S).

Part III: provides a listing of **Industry Associations & Organizations**.

Part IV: provides an alphabetical **Web Site Directory** listing all of the organizations listed in the *2006 CMB Buyers Guide*.

If you wish to be included in our *2007 CMB Buyers Guide*, please submit your information to us without delay as plans are already underway for the next edition!

For more information, send us an email at publishing@wecomcommunications.ca, send us a fax at 204-582-9800 or call us toll free at 1-800-344-7055.

Ray Blumenfeld

This Buyers Guide is also available on our corporate web site at www.wecomcommunications.ca under 'Publications'.

When it comes to optimizing your production line, we've got the solution.

Vemag Stuffers

- Available with either double-screw or vane pump technology.
- Optional in-line grinder and twist linking with sizing, for superior looking product.
- Portioning accuracy.
- A variety of specialized attachments available for optimal versatility.

Ross Tray Packaging

- Industry choice for modified atmosphere packaging of fresh meat and prepared foods.
- A full range of machines for production rates of 10-100+ packages per minute.
- Single machines or integrated line solutions.
- Features include lane control, tray carrier system, over-center die lifting system, and totally enclosed vacuum/gas flush chamber.

Fomaco Injectors

- A new generation of injectors for boneless and bone-in products.
- Self-cleaning pressure filter eliminates clogged needles.
- Adjustable pneumatic stripper system to control pressure on product.
- Control of brine flow in both down and up stroke.

Repak Form/Fill/Seal Packaging

- Heavy-duty stainless steel frame.
- Omron System Drive.
- IP65 washdown construction.
- User-friendly, touch-screen controls.
- Two 4-point lifting stations.

Holac Dicers

- Cube, strip, slice and flake.
- Ideal for fresh and cooked meats, cheese, fish, and pizza toppings.
- Automatic pre-press system ensures absolute cube uniformity for fresh meat.
- Easily changed cutting grids for sizes 1/8" to 2-1/4".
- Production rates of 500-10,000 lbs. per hour.

SuperVac Packaging

- Full range of stainless steel automatic belt-chamber vacuum packaging machines.
- Double Biactive Sealing to virtually eliminate leakers.
- Patented expansion cushion for shorter evacuation times and increased output.
- Line solution with automatic shrink tanks and driers.

Seydelmann Cutters/Grinders

- A full line of heavy-duty, high-speed cutters and vacuum/cooking cutters.
- Models for all types of products and production requirements.
- Comprehensive range of heavy-duty grinders.

AMFEC Processing

- A full line of tumblers, mixers, massagers, blenders, vacuum stuffers and dumpers.
- Wide range of capacities to fit all production requirements.
- Heavy-duty, durable construction.

Cleaning, Sanitation and Production Chemicals and Dispensing Equipment for the Food Industry

We formulate a wide variety of products for every plant need:

Acid and Alkaline Cleaners
Chlorinated Cleaners
Sanitizers and Disinfectants
Decharacterizers
Lactic Acid and Lactates

Anti-Foams and De-Foams
Poultry and Hog Scalds
Wastewater Treatments
Hide Curing Agents
Laundry Aids
Bacteriological Tests

Hand Soaps and Sanitizers
Food Grade Lubricants
Tripe and Foot Washes
Marking Inks
Truck Washes

Some people cook a batch at a time. Some people cook all day.

*That's why MTC offers you
two great ways to cook.*

SmartCooker
The Cooker with a Brain

*The SmartCooker cooks and blends
your product at the same time,
providing marvelous consistency
while cooking a wide variety of products.*

Some foods are best when cooked one batch at a time. Stuffing, ground sausage, chili, scrambled eggs and many vegetables come to mind. That's why MTC invented the SmartCooker. Its PC-based controller makes it smart enough to remember recipes and cooking times and temperatures. On the other hand, some foods are best prepared in a continuous system that takes in raw product on one side and turns out great-tasting foods on the other. At MTC, we call that the ProCooker. Ground sausage, meatballs, pizza toppings and pinto beans are ideal for this cooking system. No matter which cooker works best for the products you prepare, your results – and your profits – will be delicious.

ProCooker

*The ProCooker is used throughout the
industry to continuously cook a variety of
products, using a low-velocity steam injection system
to distribute steam uniformly without product damage.*

How to thaw a frozen turkey:
"Blow in it's ear."
- Johnny Carson

The world is full of willing people;
some willing to work,
the rest willing to let them.
- Robert Frost

All you need for a world of changing tastes

Your goal is to produce and distribute attractive food products in a cost efficient, safe and environmentally friendly way. And this is exactly what CFS stands for. As a global market leader in solutions for meat, poultry, fish, and cheese products, we help you create the very best production process. And to ensure the best possible return from your preparation, marination, processing, slicing and packaging production

systems, we also offer top-quality support, software and consultancy services.

You need a partner that understands all aspects of your business. When you buy a complete solution, you want one partner to be responsible for the whole process.

CFS, Winning in a world of changing tastes!

SWIBO: pioneer and benchmark for professional cutlery

Half a century ago, Wenger created the Swibo brand, a new type of professional knife for butchers. Since that time, the range has been consistently perfected and enlarged, becoming an international benchmark in this demanding sector. The famous bright yellow synthetic handle with its ergonomic shape, injection moulded and sealed directly into the polished, high-grade stainless steel blade, set a new standard in knife safety and hygiene. Comfortable, non-slip, with no micropores or microcracks, dishwasher safe and sterilisable: this pioneer has been copied and re-copied but still remains the benchmark. Its dedicated functions and design, engineered to deliver superior cutting strength and durability, continue to make it the knife of choice among specialists.

2 01 14 Boning knife
2 01 16 Blade: rigid, 14, 16, 18 cm.
